I am a final year student studying User Experience design (UX) in Symbiosis Institute of Design, Pune. I love working on projects that indulge me in the research procoess and problem solving. My goal is to work on products or services that help people live better and make life easy. I love to sketch, brainstorm, talk to and learn from actual users. I love working on problems with social issues and am inspired by the culture and heritage in India.

HOW I WORK

My goal is to work on products or services that help people live better and make life easy.

I am especially interested in working at the intersection of Technology and data visualization.

I love to sketch, brainstorm, talk to and learn from actual users.

Solve difficult problems, manage project details, and work closely with my team, I use visualization to model ecosystems, communicate research findings, and better understand complex relationships.

In future I would love to explore more of UX design. Interaction Design and work in a technology driven Company to enhance my skills.
